

National Chemistry Week/Family Science Night

This year's NCW theme is, "Chemistry—Our Health, Our Future!" We have FREE copies of the activity guide, "Celebrating Chemistry." Just let me know how many you need for your school. For more information about theme activities, please visit:

<www.acs.org/ncw>

It is time to celebrate National Chemistry Week with another great Family Science Night event on Thursday, October 20th, 2011, hosted by Helms Middle School in San Pablo. Hope you can join us for an evening of music with the Scientific Jam, plus chemistry magic, liquid nitrogen ice cream, and a dozen hands on activities for kids of all ages. Volunteers are needed to help greet visitors and guide them through the night's activities. The message is, "Chemistry is Fun!" If you are interested, please contact Alex Madonik-, NCW Coordinator, at 510-872-0528 or <madonika@comcast.net>
